

CONTROLLED ACCESS TO IDENTIFICATION AND STATUS INFORMATION FOR DELEGATED CREDENTIALS

ABSTRACT OF THE DISCLOSURE

An arrangement is provided for controlled access to identification and status information or delegated credentials. A delegation, formed between a delegator and a delegate, is registered with a delegate credential service provider. The delegate requests a service from a relying party that then requests, based on the requested service and the delegation, delegated credential from the delegate credential service provider. The delegate credential service provider sends the delegated credential to the relying party. According to the received delegated credential, the relying party generates a service response and sends the response to the delegate.
